

Version 6.3 | 23 October 2008

# NEC SphericaI Microbrowser

## SDK Release Notes

This is the first release of the NEC SphericaI Microbrowser SDK. This SDK consists of documentation, tools and examples that help a developer produce content in web pages that can be shown on phones that support Microbrowser technology in SphericaI v6.

### Documents

**SphericaI Microbrowser SDK.pdf** : this document provides an overview of what is included in this SDK. It also provides instructions on setting up the environment so you can work with the examples and tools within the SDK.

**SphericaI Microbrowser Support.pdf** : this document contains some of the following information:

- Information on the Webserver architecture and how it works with a typical SIP phone
- A tutorial on creating web pages that can be used within the SphericaI system
- Configuration information that is used by the SphericaI Webserver such as RSS feeds, user options
- Lua scripting in web pages
- Internationalization of web pages

### Tools

**Polycombrowser.exe** : a simple simulator of a Polycom phone's microbrowser. NOTE: The Polycombrowser application will fail to authenticate when authentication is enabled in the Webserver on SphericaI releases prior to v6.3.0.7.

### Examples

**webpages** : a folder containing example web pages that show some of the capabilities that can be added within the web pages. SphericaI Microbrowser

**Service Changes** : None - New release

**SDK Simulator Changes** : None - New release

**SDK Documentation Changes** : None - New release
